

FILTER REPLACEMENT INSTRUCTIONS

(Suitable for Aluminium Grilles only)

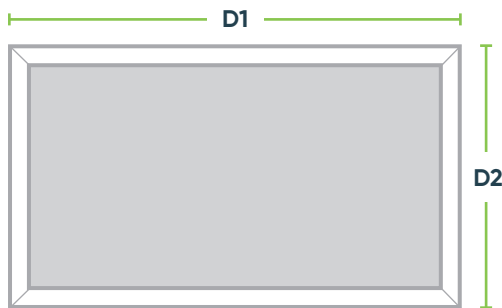

airclean[®]
clean living. easy breathing. | FILTERS

1. MEASURE

Measure flat panel filter:

D1 = Length (This is always the side that the filter slides into the grille channel)

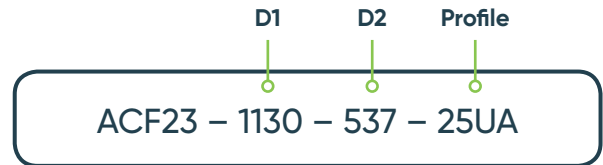

D2 = Width

2. MATCH

Match & select the AirClean Filters from the sizing chart.

Example: Part Number ACF23-1130-537-25UA

FITS INTO **1150/550** NECK SIZE GRILLE

Profile = in millimetres (mm) + or – 1mm

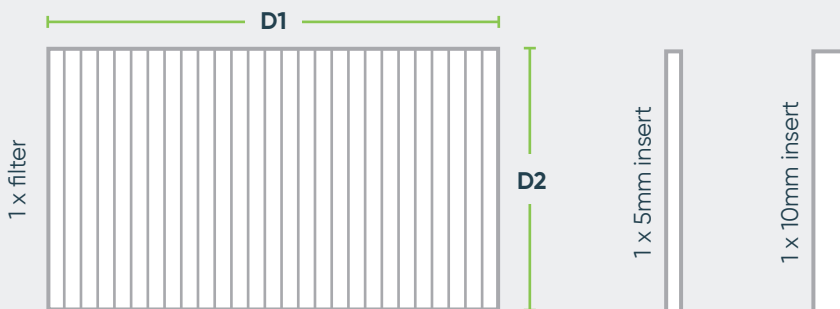

IMPORTANT NOTE: AirClean Filter's actual measurement at D1 is 10mm less to avoid fouling the fixed angle and thumb screw.

IF NO MATCH FOUND, USE BELOW PART NUMBER:

ACF16S – Insert Special Size Here – 25

3. ORDER Place your order – contact your stockist or service provider.

ALL AIRCLEAN FILTERS INCLUDE THE FOLLOWING:

NOTE: The inserts are specially designed to slide into the filter profile at **D2** side

- Use the 5mm or 10mm insert to extend the length **D1** as required (to avoid air bypass)
- An 8mm drill hole may be required through the insert to accommodate the locking thumb screw*
- Discard inserts if not required

SPECIAL NOTE: For plastic (PVC) grilles, the **D2** dimension needs to be 10mm less than the actual size to accommodate the deeper filter slide channel**

* field service requirement

** order 2 x 5mm inserts at D1 measurement
